

Helpful information regarding the treatment application:

The product used is applied at extremely low rates (less than 1.3 fluid oz. per acre). All products used by the District are approved by Federal and State regulatory agencies.

- At the application rate this product will not harm:
 - People or pets, even if present during application
 - Finishes on cars or homes
 - Fruit trees, vegetable gardens or fish ponds
- There is no need to turn off air conditioning systems during the application
- The product is applied at a time when bees are not active

Mosquito control is a shared responsibility

Prevent the spread of mosquito-borne diseases and eliminate breeding sources from your property:

Eliminate any standing water in items such as trash cans, toys, tarps and containers. Toss unneeded items that can hold water.

Clean bird baths, pet bowls and ponds. Neglected or non-circulating water features can breed mosquitoes.

Dump water from flower pots and saucers. Avoid purchasing water-holding plants such as bromeliads and lucky bamboo.

Check gutters and curbs for standing water. Clear out any vegetation in gutters.

NOTICE

The Orange County Mosquito and Vector Control District will be conducting an adult mosquito control treatment in your area

Mosquitoes infected with West Nile virus (WNV) and/or capable of carrying chikungunya, dengue, and Zika virus have been detected in your neighborhood.

In an effort to reduce the number of mosquitoes, interrupt virus transmission, and to protect the public from mosquito-borne diseases, the District will be conducting truck-mounted ultra-low volume treatments.
